

# Airlines Are Safer Than Ever

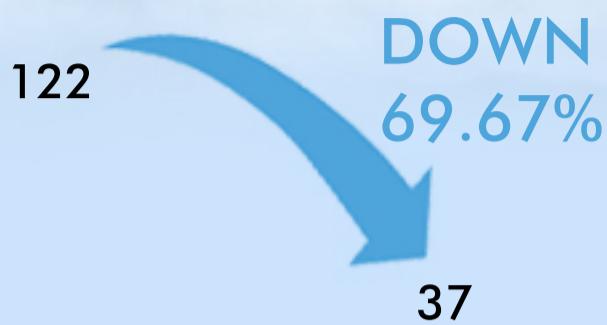

There has been a misconception portrayed by the media that airline travel is becoming more unsafe. This infographic shows that this is simply not the case.

The first data shows safety records for 56 of the major commercial airlines across the globe from 1985 to 2014, data courtesy of FiveThirtyEight

The second dataset is US crash statistics from 2000 through 2020, gathered from the National Transportation Safety Board.

# Fatal Airline Accidents

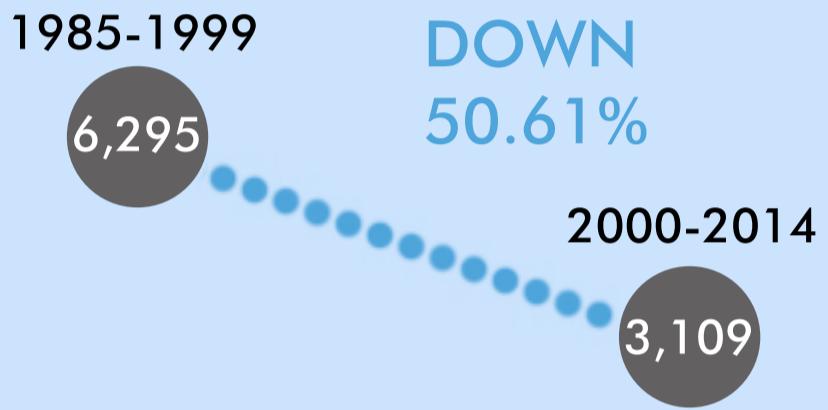

# Airline Incidents

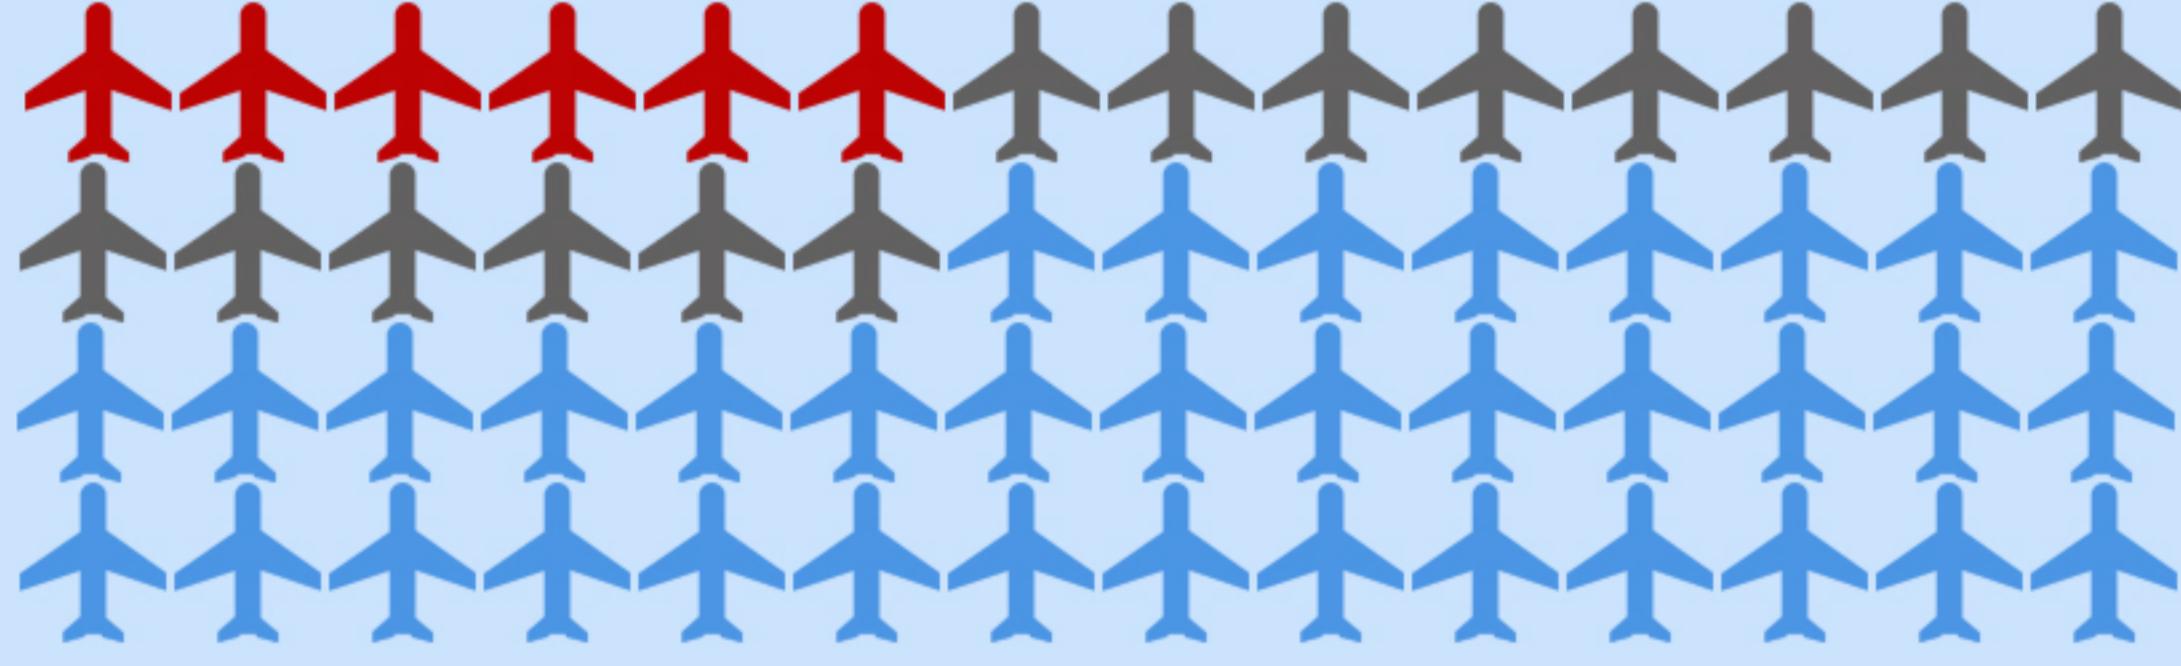

**1985-1999      2000-2014**

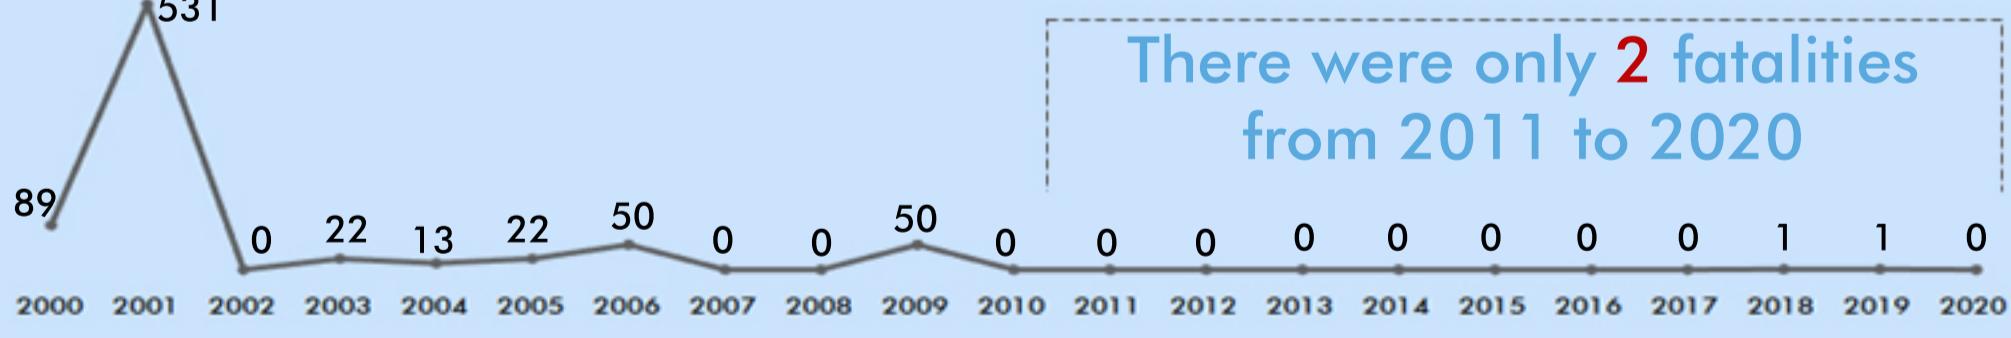

# Airline Fatalities

Comparing fatal accident volume: (1985-1999) to (2000 - 2014) out of 56 Airlines:  
6 saw an **increase**  14 saw **no change**  36 saw a **decrease** 

# Airline Fatalities 2000 - 2020 (U.S. Air Carriers)

## Airline Fatal Accidents & Total Accidents 2000 - 2020 (U.S. Air Carriers)
